

Suomalais-Ugrilaisen Seuran Aikakauskirja (Journal de la Société Finno-Ougrienne)

Instructions to authors

Suomalais-Ugrilaisen Seuran Aikakauskirja (Journal de la Société Finno-Ougrienne) is an international journal published by the [Finno-Ugrian Society](#) since 1886. In its present form, the SUSA/JSFOu is a peer-reviewed journal which appears approximately biennially. The journal welcomes original scholarly contributions on any aspect of research into the Uralic and so-called Altaic languages, the ethnography of their speakers, as well as the historical and pre-historical past of those that speak these languages.

All article manuscripts will be evaluated by two anonymous reviewers. Their decision, with respect to the eligibility for publication, will be acknowledged by the editor. Proposals for improvements will be forwarded to the authors.

The language of the paper can be freely chosen. Section and subsection headings are recommended. The headings should be numbered (1., 1.1., 1.2., 2., etc.) and, vice versa, the subsections should not be numbered without headings.

Please use **italics for linguistic material** and single quotes for glosses (e.g. *muorra* ‘tree; wood’).

References are made in the text (and not in the footnotes) as follows:

“... since Itkonen (1950) it has been ...”, “... according to Honti (1998: 336–338) it is ...”, “... (cf. Setälä 1894: 278; 1897; 1912: 194–197).”

Special characters. If the paper includes uncommon special characters or non-standard fonts, misunderstandings and conversion errors can be avoided by using an unambiguous combination of standard characters for each special character, the meaning of which can be explained as follows:

e\$ = e (e + 032E)

eℓ = ə (0259)

o\$ = ö (0254 + 0308)

oℓ = õ (0254 + 0308 + 0304)

r\$ = ð (r + 0300)

etc.

(hence, **muor\$e\$, ko\$meℓn* and *noℓmeℓn* in the manuscript can be converted to **muorë, kämän* and *nõlmən*)

You are also recommended to give the adequate Unicode character codes as shown in brackets. You will find them on the website of [Unicode Consortium](#).

Transliteration. When transliterating Cyrillic and other non-Roman scripts, this must be done in a consistent manner according to established scholarly traditions (e.g. the Uralic Phonetic Alphabet a.k.a. the Finno-Ugric transcription system⁴), and official standards (the International Scholarly System⁵ or ISO 9:1995⁶).

Glossing of examples. The authors are strongly encouraged to follow the guidelines set out in the Leipzig Glossing Rules (<http://www.eva.mpg.de/lingua/files/morpheme.html>).

Less well-known **abbreviations** (for the names of languages, dialects, reference works and scholarly terms including glosses) should be explained on first mention and/or in a list at the end of the paper. All abbreviations should be understood without recourse to external sources.

In the **list of references**, follow the examples below:

If you have any questions concerning other technical details, such as special characters or the layout of tables or pictures in the final publication, please consult the editor before submitting the paper.

In **the first submission**, papers may be submitted either on paper or electronically in one of the following formats: .doc (MS Word), .rtf (Rich Text Format), .wpd (WordPerfect) or .pdf (Adobe Acrobat). However, the authors should be aware that in **the final submission**, accepted papers can be submitted in .doc, .rtf and .wpd formats only.
